

# Take your time and create the future

## Philips Digital Pocket Memo® 9400

Philips now offers a sensational full dictation package for the professional user.

The Digital Pocket Memo® 9400 includes the SpeechExec Pro Dictate software, Docking Station 9110 and a Philips Multimedia Card. It brings together ergonomic, efficient functionality and system-integrated workflow management for the most complete professional dictation package.

# PHILIPS

## Digital Pocket Memo® 9400

### Key benefits of the Digital Pocket Memo® 9400

- 4-Position switch enables single-handed use, allowing you to continue working in the most familiar way
- Workflow management capability includes definition of keywords
- Upload function: Database data/information can be uploaded to the device automatically
- Exchangeable Multimedia/SD Card provides simple, efficient data transfer and flexibility when on the move
- DSS file format, the industry-standard file format for recording devices, offers minimum file sizes while maintaining crystal clear sound quality.
- End-of-letter index marks a dictation file as complete and automatically generates a new file (this button can also be disabled)
- Priority index marks a dictation file as urgent
- Spoken instruction index
- Voice-activated recording gives users hands-free dictation.
- Insert, overwrite and delete functions allow full editing and continuity of dictation (these buttons can also be disabled).
- Internal recharge option enables rechargeable batteries to be replenished during use when connected to the main power supply (use only Philips Rechargeable Batteries 9144)
- Backlit LC display makes reading the display in poor light conditions easier
- Two display settings allow users to select how information should be displayed on the screen (numeric or graphical)
- Three-level adjustable microphone sensitivity can be set for conference or close-range recordings
- Easy, automatic download of dictations to your PC via USB connection
- E-mail/FTP function for manual and automatic dictation transfer
- User-defined label entry lets you label a dictation without being connected to your PC

### Additional features of the Digital Pocket Memo® 9400

- Transport lock avoids unintentional operation
- USB mass storage device: The Multimedia Card can be used to store data as well as voice recordings
- Double-sided aluminum casing enhances durability
- Volume control
- Two-color LED indicator shows record status
- LC display shows creation time/date, size of the dictation file, operating mode and battery status
- Warning tone signals low/full memory and low battery to avoid dictation loss
- Standard play/long play modes of recording suit user preferences
- Standard USB audio device for direct dictation to your PC
- Power save mode: Sleep mode after four minutes without dictation, switch-off after two hours without dictation
- Link dictation with other files and information using barcodes with the addition of Barcode Scanner Module 9284.
